OWS Contractor (Installer) Definition: A “Contractor (Installer)” is an individual licensed as a general engineering contractor, a general building contractor, a plumbing contractor or a sanitation system contractor with the California State Licensing Board. These licenses are listed as Class A, B, C-36 and C-42. **Please note that apart from this list, anyone holding the licenses described above has the ability to install/construct an Onsite Wastewater System in the State of California.**

***Note:**

1. This list is provided for your convenience.
2. Alameda County Environmental Health Department (ACEHD) is not affiliated with this list.
3. ACEHD does not certify, endorse or recommend any Consultant/Contractor or their services.
4. This list may not include other Consultants or Contractors that may be available in the industry.
5. This list may change without notice.
